# Electronic Supplementary Information

## Table of Contents

Section	Page
S1 BSE49: Molecular Representations	S-2
S2 Classical Feature Reduction	S-2
S3 DDCC Fake Quebec	S-3
S3.	S-5

# 1 BSE49: Molecular Representations

Figure S1: Coulomb matrices (CMs), Molecular ACCess Systems (MACCS), persistence images (PIs), RDKit and Morgan fingerprints. Performance of a diverse set of molecular representations  $R^2$

## 2 Classical Feature Reduction

Figure S2: Feature reduction of the BSE dataset represented using

Figure S3

### 3 DDCC Fake Quebec

Ran using the state vector model parameters for one iteration to test the optimization and resilience levels using Fake Quebec before running on the real device

Figure S4

Figure S5
